Lifting Australian Industry

# HPF-T Series Tilt Tailgates

HPF Tailgates meet and exceed Australian standards and have been developed in close association with the Australian transport industry. There are models to suit all vehicles, from utilities to semi-trailers, with our custom service being able to supply a solution for everything in between.

## Tilt Tailgates

### Load capacities from 500kg to 3000kg

The HPF-T Series offers a tapered modern design that gives it maximum strength, reliability and high productivity performance. This offers a smooth and attractive surface that can be used for fleet graphics. The HPF Tilt series of tailgates is available in lift capacities ranging from 500kg to 3000kg and gives the operator complete control of the platform angle and is ideal for dock loading.

### Standard Features

- Steel platform construction
- Chrome hardened pivot pins
- Self lubricating bushes
- Two lift cylinders
- Two tilt cylinders
- Four button handheld remote control
- Four button fixed control station
- Battery Isolator switch
- Hydraulic closure
- Gravity lowered platform reduces battery drain
- Only 2000kg steel platform in Australia with 5000kg rollover
- Wear rollers on tilt cylinder at platform pivot point
- Flow control valve adjusts platform descent
- Travel locks to secure closed platform
- Platform angle adjustable by operator
- Wide frame lift mechanism improves stability
- High ground clearance
- Can be used as rear door
- Four cylinder design improves stability
- Available in 12 or 24 volt
