

HPF-T Series Tuckaway Tailgates

Lifting Australian Industry

Tuckaway Tailgates

HPF Tailgates meet and exceed Australian standards and have been developed in close association with the Australian transport industry. There are models to suit all vehicles, from utilities to semi-trailers, with our custom service being able to supply a solution for everything in between.

Tuckaway Tailgates

Load capacities from 500kg to 1000kg

The HPF-TK Series was designed to maximise body length by completely storing away under the vehicle while not in use. It is suitable for handling general purpose loads and is equipped with more standard features than any tailgate of its class. It has the strongest lift frame in the industry and is built to last. The HPF Tuckaway Series is available in capacities ranging from 500kg to 1000kg.

Standard Features

- Aluminium or steel platform constructions
- Chrome hardened pivot pins
- Self lubricating bushes
- Two lift cylinders
- Four button handheld remote control
- Battery Isolator switch
- Spring assisted closure
- Roll out bar to assist platform opening
- Flow control valve adjusts platform descent
- Travel locks to secure closed platform
- Platform level adjusters
- Gravity lowered platform reduces battery drain
- Store completely under vehicle body out of the way when not in use
- Maximise vehicle body length
- Wide frame lift mechanism improves load stability
- Large platform area
- Available in 12 or 24 volt
